

JOB POSTING

TITLE	Transmission Engineer
DEPARTMENT	Commercial
CLASSIFICATION	Exempt
LOCATION	Elmhurst, IL or Greater Denver Area, CO preferred. *Remote work negotiable to adhere to COVID-19 safety requirements.
COMPENSATION RANGE	\$80,000-120,000 per year

THE COMPANY

GlidePath Power Solutions LLC is a developer, owner, and operator of clean energy projects throughout the United States. GlidePath is developing over 3,500 MW of projects across the country, with a particular emphasis in battery storage technology. Based in Elmhurst, IL (Chicago), GlidePath is poised to deploy \$1B in capital investments in the near-term.

JOB DESCRIPTION

GlidePath's interconnection and transmission function is responsible for supporting the development and operations of new and operational projects and serves as the interface between internal stakeholders and utilities, system operators, and regulatory entities. This position is best suited for an individual with storage/renewables development, ISO/RTO, utility, or consulting experience who is seeking an engaging role with exposure to the quickly evolving energy storage and renewable industries. GlidePath will also consider candidates without electric power industry experience that can grow into the role, with appropriate adjustments to responsibilities and compensation.

RESPONSIBILITIES

- Consult in project development decisions for new site prospecting, including reviewing IRPs, planning studies, interconnection studies, locational transmission capacity, physical interconnection feasibility, and estimated project costs.
- Serve as primary point of contact for transmission service providers, ISOs, utilities, and manage day-to-day activities for interconnection activities throughout the development, engineering, and construction process. Lead discussions of utility standards, interconnection study reports, interconnection agreement negotiation, and other external interconnection matters.
- Coordinate the development of conceptual project designs and interconnection application materials which comply with internal stakeholder requirements. This includes developing single-line diagrams and general arrangements for new energy storage and solar projects as well as coordinating necessary deliverables with interconnecting utilities and/or ISOs.
- Summarize and communicate project requirements to internal stakeholders, including transmission operator tariffs, interconnection agreements, utility/ISO standards, and NERC requirements. Review and comment on project engineering drawings and equipment specifications for compliance with these requirements.
- Attend utility and ISO stakeholder and project-specific meetings via teleconference and/or in person (in coordination with GlidePath COVID-19 policies regarding travel and in-person meetings).
- Advise on technical transmission topics for FERC, state-level, or other regulatory filings.
- Select and manage external technical, regulatory, legal, and/or other consultants necessary to support the responsibilities of this role.

SKILLS & REQUIREMENTS

- Bachelor's or graduate degree in Power/Electrical Engineering or related fields.
- 0-5 years of experience within the electric power industry.
- Excellent analytical and problem-solving skills.
- Strong organizational and time management skills.

- Strong verbal and written communication skills. Effective at communicating technical topics to non-technical audiences and representing GlidePath in a professional manner when working with external parties.
- Prior experience in new project interconnection from developer, consultant, or utility/ISO perspective, or transmission-level project design, or electrical project design in storage and/or generation development.
- Ability to understand transmission tariffs, generator interconnection procedures, study methodologies, and stakeholder processes in ISO and non-ISO regions.
- Travel up to 25% of the time.

ADDITIONAL SUCCESS FACTORS

- Familiarity with energy storage technologies and applications.
- Experience with PSS/E, PSLF, PSCAD, ASPEN, and/or other commonly used technical studies software.
- Exposure to or experience with techno-economic analysis, e.g., curtailment studies, SCED, etc.
- Experience with providing technical testimony in regulatory proceedings.
- Analytics and/or programming experience.

PHYSICAL DEMANDS

The physical demands described here are representative of the requirements that must be met by an employee to successfully perform the essential functions of this job. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions to the extent such accommodation does not create an undue hardship on the business. While performing the duties of this job, the employee is regularly required to use a computer keyboard and mouse; reach with hands and arms; talk and listen. The employee is frequently required to sit or stand at a desk and utilize a computer for extended periods of time. Employee may also experience outside work environments while onsite as well as occasional travel.

The above statements are intended to describe the general nature and level of the work being performed by people assigned to this job position. This is not an exhaustive list of all duties and responsibilities. Glidepath reserves the right to amend and change responsibilities to meet the business needs as necessary.

BENEFITS

Glidepath provides a comprehensive benefits package that include telecommuting, unlimited paid time off, medical, dental, vision plans, health savings account (HSA), 401(k), term life insurance, short-term and long-term disability benefits.

TO APPLY

Please send a resume with subject line: **“Transmission Engineer”** to careers@glidepath.net
